

Job Title: Maintenance Line Operator Tech

Location: North Carolina

Department: Production

Reports to: Production Team Manager

Status: Currently Accepting Applicants

Position Summary:

The Line Operator is responsible for the technical operations, packaging and quality of the products produced on their line. A Line Operator should be knowledgeable in all procedures, packaging and quality needed to insure the proper, safe and efficient operation of their line. A Line Operator should have an understanding of the extrusion and winding process, be knowledgeable of the roll quality (cosmetic) requirements and be able to fine tune the equipment in order to produce high quality products that meet our standards. Position also requires a basic working knowledge of mechanical, electrical and pneumatic applications. The successful candidate should be able to locate and diagnose failures and perform basic troubleshooting. Should be skilled in a variety of hand tools and able to maintain computer system records.

Preferred Skills and Minimum Requirements:

1. High School Diploma
2. One to Three years experience and/or formal training, preferred.
3. Able to lift a minimum of 80 pounds
4. Able to climb silos and railcars
5. Able to fully operate a forklift.
